

NESTABLE, RACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

Plastic pallets improve in-house storage capabilities, minimize potential damage to cargo, and facilitate the movement of goods in manufacturing, food processing, warehousing, and distribution processes. These closed deck pallets enable unit loads to be stored vertically above the floor, due to six runners that make pallets sit safely on top of a rack. A gas-injection manufacturing process creates internal cavities in the plastic pallets support system for enhanced resilience and rigidity. Plastic pallets do not splinter or warp for ergonomic handling. When used in a high bay racking system, they have high circulation rates and long lifespans.

SPECS

- **EASY TO CLEAN:** Resists chemical spills, moisture, mildew and is easy to sanitize
- **CLOSED DECK:** Prevents loose material from slipping through, fewer pressure points, sturdy
- **HEAVY DUTY:** Static load capacity in up to 17,600 lbs.
