

RACKABLE PLASTIC PALLET

REUSABLE TRANSPORT PACKAGING

USAGE

These 48" x 32" rackable pallets improve in-house storage capabilities, minimize potential damage to cargo, and facilitate the movement of goods in manufacturing, food processing, warehousing, and distribution processes. Plastic pallets enable unit loads to be stored vertically above the floor, due to six runners that make pallets sit safely on top of a rack. A gas-injection manufacturing process creates internal cavities in the rackable pallets support system for enhanced resilience and rigidity. Rackable pallets do not splinter or warp for ergonomic handling. When used in a high bay racking system, rackable plastic pallets have high circulation rates and long lifespans.

Open & Closed Deck Versions Available

SPECS

- **EASY TO CLEAN:** Resists chemical spills, moisture, mildew and is easy to sanitize
- **HEAVY DUTY:** Static capacity of 13,200 lbs. and a dynamic capacity of 5,500 lbs.
- **EDGE RACKABLE:** Racking capacity of 2,400 lbs. for use in high racking systems
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts for expedited item transfer
- **100% RECYCLABLE:** Eco-friendly polymers can be recycled when not in service
- **OPTIONS:** Open or closed deck, anti-slip strips, ESD, fire retardant, and RFID available

DIMENSIONS

Model	Dimension (In.)			Material	Base Config.	Deck	Weight Capacity (lbs.)			Tare Weight (lbs.)
