

RACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

Rackable plastic pallets eliminate damage from loose nails, splintering, and structural warping that are common issues with wooden alternatives. Pallets can be used with open span storage systems, edge racking, and beam racking. High pressure injection molded rackable pallets are manufactured from HDPE structural foam for superior impact resistance. Rackable pallets are ideal for export, pharmaceutical, and agricultural applications that require handling heavy duty cargo in racking systems or automated conveyors. Rackable pallets are also available in FDA compliant HDPE that is safe for direct contact with food and is ideal for food handling activities that require high racking capabilities.

SPECS

- **MINIMAL MAINTENANCE:** Resistant to mold, mildew and rib design is easy to clean
- **ERGONOMIC HANDLING:** 4-way forklift and pallet jack access with tapered openings
- **LOAD CAPACITY:** Up to 2,100 lbs. in an edge-supported rack
- **PRODUCT PROTECTION:** Top and bottom decks equipped with anti-skid grommets.
- **FOOD GRADE:** Made from FDA and USDA approved materials
- **100% RECYCLABLE:** All plastic, eco-friendly design can be fully recycled
- **ISPM-15 EXEMPT:** Cuts in-house sanitation costs, and simplifies export procedures
- **OPTIONS:** Perimeter lip, virgin or recycled resins, color options, labeling and IDs available
