

LINE: R4840I03-X

RACKABLE AND STACKABLE PLASTIC PALLET

USAGE

This durable and lightweight reusable plastic pallet utilizes a one-piece construction that combines excellent performance with economy. The picture frame bottom, with runners on all four sides, provides the rigidity needed for edge racking in space saving storage racks. These pallets also can be stacked two or more high when fully loaded, with the bottom pallet capable of handling an impressive static load of up to 25,000 pounds. These versatile pallets are ideal for warehouse racking systems, stack loading, closed loop transport, floor storage, and automated material handling processes.

SPECS

- **MATERIAL:** Injection molded high-density polyethylene (HDPE)
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts and pallet jacks
- **CONFIGURATION:** One-piece design with open deck and picture frame base with 4 integrated runners
- **RESILIENCY:** Corrosion and UV resistant, and able to withstand temperatures from 0° to 140°F
- **COLOR OPTIONS:** Available in black, blue, red and green
