

STACKABLE PLASTIC PALLET

REUSABLE TRANSPORT PACKAGING

USAGE

Perfect for implementation in high-rotation transport industries, plastic shipping pallets have robust carrying capacities, long lifespans, and are designed to be impact resistant. Structurally rigid, durable and fully recyclable, gas-injection polymers are also highly resilient, resistant to bending, and are perfect for high-bay racking. Used in either open or closed-loop operations, plastic pallets are far more efficient and eco-friendly option than disposable wood or metal alternatives. Thanks to a robust design, these pallets can be used with FIBC's, and are fully rack compatible.

AVAILABLE IN FOUR CONFIGURATIONS

SPECS

- **OPEN OR CLOSED DECK:** Choose from open or closed deck design
- **BASE CONFIGURATIONS:** Choose from a 3-runner or 6-runner base
- **NON-SLIP:** Per request, slide protection can be applied to top or bottom of pallet
- **RACKABLE:** Dependable for racking and warehousing of items
- **HOLLOW CHANNELS:** Injection molding creates ultra-resilient hollow channels
- **EASY SANITATION:** Resists chemical spills, moisture, and mildew, and is easy to clean
- **CUSTOM OPTIONS:** RFID, custom labeling, color options, anti-skid strips, grommets, and safety rims
