REUSABLE TRANSPORT PACKAGING

NESTABLE PLASTIC PALLET

USAGE

Nestable plastic pallets are ideal for material handling operations in warehouses, distribution centers, or closed loop supply chains. Dimensional consistency makes plastic pallets compatible with high speed automation systems. When empty, plastic pallets nest atop one another for cost-effective return freight and storage space use. Conical feet allow for secure nesting ratios of up to 4:1. Nestable plastic pallets do not rot, splinter, or grow mildew – allowing for extended service life and minimal maintenance requirements.

SPECS

- **DURABLE CONSTRUCTION:** Built from rugged and reliable ACM or HDPE
- **HEAVY CAPACITY:** Dynamic loads up to 2,600 lbs.
- **DECK DESIGN:** Available in both closed and open deck models
- **ERGONOMIC HANDLING:** Compatible 4-way fork entry for efficient mass transport
- **100% RECYCLABLE:** Long lasting polymers can be recycled when necessary for future use
- **OPTIONAL ACCESSORIES:** Identification, labeling, hot stamp, numbering, color choice
- **NESTABLE:** Massive space savings when pallets are nested inside each other
- **APPLICATIONS:** Applications: Retail, manufacturing, bulk item transport, distribution centers, industrial
