## TRANSPORT PACKAGING

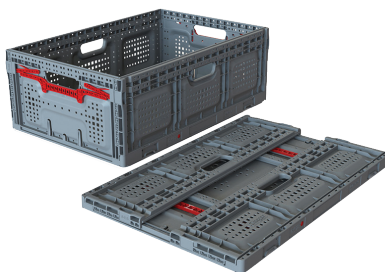

# HARVEST CONTAINERS

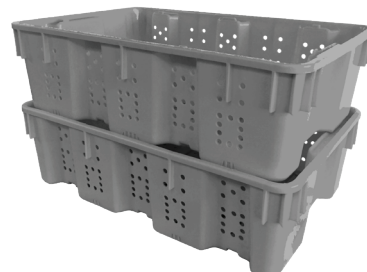

Lightweight, inexpensive, and durable, handheld plastic containers are favorites in the hemp industry. Growers can harvest buds directly into the containers, and use them for intermediate storage. This means the buds require only a single touch, reducing contamination and loss and potentially preserving cannabinoids, terpenes, and flavonoids. When not in use, various styles can fold easily and/or stack securely — saving space and return freight costs.

## POPULAR HANDHELD HARVEST CONTAINER STYLES

**Foldable  
RPC Containers**

**Stack & Nest  
Plastic Totes**

**Stackable Agriculture  
Containers**

**Nesting Food Handling  
Containers**

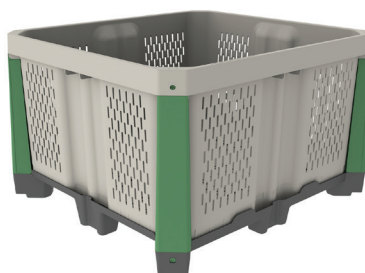

Large scale cannabis producers need industrial-strength agricultural solutions. For whole-plant hemp harvesting, vented agricultural bulk containers provide the best value. From root to bud, these containers hold it all.

Available in various sizes and heights, these containers are used to carry large quantities of cannabis. Built for field harvesting, resistant to contaminants, and easily washable, they are among the strongest and most durable bulk packaging products. Key design options include either fixed walls or collapsible walls, providing optimization for any operation.

## POPULAR HARVEST BULK CONTAINER STYLES

**Fixed Wall  
Bulk Containers**

**Nestable Agricultural  
Bulk Containers**

**Collapsible Agricultural  
Bulk Containers**

# DRYING TRAY SYSTEMS

Reusable plastic and fiberglass trays are the ideal solution for bud drying. With endless sizes and features available, handheld trays and shallow crates have become a staple in agriculture industries worldwide. They're lightweight but strong enough to protect sensitive contents. They're waterproof and easily cleaned. Their vented sidewalls optimize airflow. And their portable sizes and stackability improve handling and sorting processes.

## POPULAR DRYING TRAYS STYLES

**Stackable Agriculture Containers**

**Stackable Fiberglass Trays**

**Shallow Foldable RPC Containers**

## DRYING RACKS

Paired with trays, metal drying racks are trusted workhorses in the cannabis industry. Built to withstand the demands of industrial production, they're constructed to hold up to 1,500 lbs. Available in sizes ranging from 24" to 96" and with wide range of shelf styles, including stainless steel wire (pictured), chrome, solid surface stainless steel, and poly.

**Rolling Cannabis Drying Racks**

# CURING & STORAGE CONTAINERS

Industrial operations require industrial-strength containers. Instead of purchasing low quality and high cost household containers from big box stores, go with the containers trusted by manufacturers worldwide. We carry hundreds of styles of air-tight storage containers in as many size and color options. Whether you need to store small quantities of finished product or you need a scalable option for mass curing, we've got you covered.

## POPULAR MEDIUM FORMAT STORAGE CONTAINER STYLES

**Snap-On Lid Containers**  
Best Value

**Stack & Nest Containers**  
Heavy Duty

**10-77 Gallon Fiber Drums**  
Commonly Used

When it comes to industrial curing, retting, and storage, reusable bulk containers can't be beat. Available in traditional bulk and intermediate sizes with options of hard walls, bags, and sleeves.

## POPULAR BULK CONTAINER STYLES

**Bulk Poly Bags**

**Corrugated Paper Bulk Boxes**

**Sleeve Pack Containers**

**Vented Tank Bulk Containers**

**Collapsible Intermediate Bulk Containers**

**Fixed Wall Bulk Containers**

# DISTRIBUTION PACKAGING

For convenient shipping to dispensaries and other vendors, nothing beats reusable plastic containers. They're a mainstay of retailers worldwide for a few simple reasons: they're lightweight, incredibly durable, inexpensive, and maximize space. Options range from dimensions of nearly every size, a rainbow of stock colors, and an abundance of convenience features, such as handles, nesting sidewalls, latches, security strap points, and more.

## POPULAR HANDHELD CONTAINER STYLES

**Attached Lid Containers & Dollies**  
Most Popular

**Straight Wall Totes**  
Maximum Capacity

**Corrugated Plastic Boxes**  
Best Value

When it comes time to move a lot of products, nothing beats what the industrial pros use. Designed for manufacturers and distributors, reusables provide the best value for every load.

## POPULAR BULK DISTRIBUTION STYLES

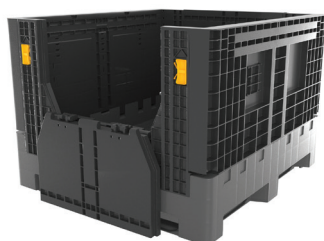

**Rackable Plastic Pallets**

**Nestable Plastic Pallets**

**Pallet & Top Cap Systems**

**Collapsible Bulk Containers**

**Stock & Shelf Carts**

**Metal Wire Security Carts**

# POLY BAGS & WRAPS

Poly bags are often an essential part of hemp and cannabis processing, storage, distribution, and retail. Used for everything from vacuum sealing pallet-sized loads to packaging individual consumer products, poly bags come in all sizes. Options include a variety of material gauges (typically ranging from 1 to 6 mil.), closures styles, and wall configurations. Additional branding and label options exist with bespoke printing.

## POPULAR POLY BAG STYLES

**Bulk Container, IBC, and Drum Liners**

**Gusseted or Flat  
Open Top Bags**

**Reclosable Bags**

**Poly Pallet Covers**

**Gusseted or Flat  
Poly Tubing**

**Stretch & Shrink Wrap**

# MAP EQUIPMENT

Modified Atmosphere Packaging (MAP), sometimes called Controlled Vacuum Packaging, preserves, protects, and extends the shelf life of your products through the use of vacuum sealing and optional gas flushing. We carry top of the line MAP equipment for operations of all sizes — from small poly bags to large bulk containers.

**Dual Chamber Vacuum Modified  
Atmosphere Packer**

**Chamber Vacuum Modified  
Atmosphere Packer**

**Mark III Modified Atmosphere Packer  
Bulk Bin Roll Around**

This model features a rolling base and adjustable height settings. This equipment is designed for ease of use with bulk containers, gaylords, barrels, and intermediate bulk containers. Ideal for large scale cannabis storage operations.

Bags are gas flushed, vacuumed, and hermetically sealed for unparalleled product quality.

Alternative models feature fixed bases, either floor-mounted or ceiling-mounted. They're compatible with assembly lines and other automation processes.

# RTP: THE TRUSTED PARTNER

With decades of experience, Reusable Transport Packaging is a trusted provider of the highest quality freight, distribution, and material handling products. With the emergence of the legal cannabis and hemp industry, we have remained at the forefront of packaging innovation. Our inventory includes thousands of products from our industry's leading brands. Our team of experts is eager to help you navigate the seemingly endless array of products and options and find the perfect solutions for your cannabis and hemp operations.

---

## THE RIGHT PRODUCTS, RIGHT WHEN NEEDED

We stock and ship an extensive catalog of reusable containers and plastic pallets. Our distribution centers are located throughout the United States, so we're able to get you the containers you need, quickly and at a lower delivered price. We offer a number of service options, including:

### BUY

We sell hundreds of styles of reusable plastic containers. We pride ourselves in offering a diverse inventory that is "in-stock and ready to ship." We also offer a number of used products, which provide additional flexibility and value for our customers.

### RENT

Need containers intermittently? We offer trip, seasonal, and long-term lease options for bulk containers. This provides our customers with the ability to have the containers they need — when needed — with minimal investment and commitment.

### BUY-BACK

As part of our commitment to sustainability and partnership, we offer a comprehensive buy-back program for many of our container and pallet products. This program provides tremendous value to our customers while embracing the reusability and longevity of our products.
