

RACKABLE PLASTIC PALLET

REUSABLE TRANSPORT PACKAGING

USAGE

Rackable pallets improve in-house storage capabilities, minimize potential damage to cargo, and facilitate the movement of goods in manufacturing, food processing, warehousing, and distribution processes. These 43" x 43" open deck plastic pallets enable unit loads to be stored vertically above the floor, due to three runners that make pallets sit safely on top of a rack. A gas-injection manufacturing process creates internal cavities in the rackable pallets support system for enhanced resilience and rigidity. Plastic pallets do not splinter or warp for ergonomic handling. When used in a high bay racking system, rackable plastic pallets have high circulation rates and long lifespans. This pallet is available with metal reinforcements.

SPECS

- **RACKABLE DESIGN:** Compatible with overhead storage racks, allowing for increased storage capability and efficiency
- **OPEN DECK:** Allows flow-through for any spills or leaks, and facilitates easy cleaning and drying
- **HEAVY DUTY:** Cargo load capacity in high racks from 1,102 lbs. up to 3,307 lbs. (reinforced)
- **OPTIONAL METAL REINFORCEMENTS:** Facilitates increased load capacities in high racking systems
- **EASY TO CLEAN:** Resists chemical spills, moisture, mildew and is easy to sanitize
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts for expedited item transfer
- **RECYCLABLE:** Eco-friendly polymers can be recycled when not in service
