SPECIALTY PLASTIC DRUM PALLET

USAGE

Plastic drum pallets accommodate the specific handling needs of drums and barrels in any industry or application. Plastic drum pallets feature lips on the top deck that prevent drums from sliding and shifting during transport. Plastic pallets are safer, cleaner, more sustainable alternatives to traditional wooden pallets. Manufactured from high-quality plastics, these pallets prevent any mildew/mold, bacteria, and insects from harboring within the pallet. In addition, each pallet features a uniform construction, which means there's no weak links, no splintering, and no rusty nails.

SPECS

- **MATERIAL:** Made from durable, structurally rigid high-density polyethylene (HDPE)
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts
- **RACK COMPATIBLE:** Interfaces with vertical racking systems to optimize space savings
- **STACKABLE:** Allows for efficient, safe stacking that reduces transport costs
- **STABILITY:** Picture frame bottom with runners on all four sides
- **SUSTAINABILITY:** Reusable and 100% recyclable at the end of its service life
