ONE-WAY PLASTIC PALLETS FOR DISTRIBUTION

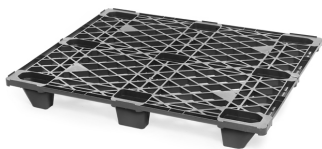

LINE: EN.17 & EN34

The Affordable Alternative to Wood Pallets

USAGE

Plastic export pallets are the ideal alternative to wood pallets for one-way distribution. They're inexpensive, lightweight, and extremely strong. These pallets are manufactured from advanced HDPE/PP material to create an affordable product that is perfect for safe bulk item handling. They are stackable and nest inside conical feet, reducing pallet volume by up to 75%. Simple, clean, and efficient, these 48" x 40" nestable, open deck plastic pallets offer an environmentally friendly and economically sound alternative to traditional wood pallets.
