REUSABLE BULK CONTAINER

REUSABLE
TRANSPORT PACKAGING

RTP

USAGE

Reusable bulk containers & sleeve pack containers are durable, lightweight alternatives to one-piece molded plastic bulk containers. Reusable, thermoformed, plastic pallets, and tops have a ten to fifteen-year life expectancy. Reusable bulk containers have a compact design allowing for maximized cube utilization and secure stacking. These sleeves are made from durable hexacomb corrugated plastic or fiberboard composite, top & bottoms are manufactured from either thermo-molded or injection molded HDPE polyethylene resin. These containers stack 5 to 6 high when full, interlocking feet and lid, allow for unitized stacking.

SPECS

- **MATERIAL:** extrusion/thermoformed, PP/HDPE
- **EFFICIENCY:** 1:2 return ratios for closed loop supply chains
- **CUT COSTS:** Pallets and tops are nestable, and sleeves are collapsible, reducing shipping fees
