RACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

One of our most competitively priced pallets, these rackable plastic pallets accommodate heavy product loads in closed loops, production plants, and goods distribution. Rackable plastic pallets with 6 runners ensure that loaded can double stack securely and that empty pallets stack uniformly. Six-runner configurations meet the highest demands of block stacking and protect cargo stored below from impact and damage. Precise dimensions and design considerations increase process reliability in conveyor technology and reduce the risk of damage from improper handling. Rackable plastic pallets maximize stability and versatility for handling operations of bulk cargo loads, meaning pallets maintain their structural integrity throughout a long service life.

SPECS

- **RACKABLE:** Compatible with racking systems and dependable for warehouse operations
- **OPTIONAL REINFORCEMENTS:** Additional metal reinforcements available by request
- **VERSATILE:** Multiple customizable build styles and carrying capacities available
- **OPEN OR CLOSED:** Choose from open or closed deck design
- **HOLLOW CHANNELS:** Injection molding creates ultra-resilient hollow channels
- **EASY SANITATION:** Resists chemical spills, moisture, and mildew, and is easy to clean
- **OPTIONS:** RFID tracking, custom labeling, color options, anti-slip grommets, and safety rims available
