STACKABLE FIRE RETARDANT PLASTIC PALLET

USAGE

Stackable plastic pallets are designed with a picture frame bottom, and runners on all four sides so that the bottom pallet can securely handle the full static load when loaded pallets are stacked two or more high. Plastic pallets are one of the most competitive ways to transport bulk items in any industry. Manufactured from high-density polyethylene, these stackable plastic pallets are low maintenance, lightweight, and impact resistant in the most severe material handling conditions.

SPECS

- **MATERIAL:** Virgin recyclable high-density polyethylene (HDPE)
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts
- **FIRE RESISTANCE:** FM 4996 approved
- **STABILITY:** Picture frame bottom with runners on all four sides
- **HIGH WEIGHT-TO-STRENGTH RATIO:** Only 35 lbs. tare weight with 30,000 lbs. static capacity
