COLLAPSIBLE HANDHELD CONTAINER

REUSABLE
TRANSPORT PACKAGING

RTP

USAGE

Handheld collapsible RPCs are an efficient, stackable and secure way to transport materials while taking up minimal space. Handheld collapsible RPCs help save money and have a convenient foldable design for easy handling and a minimal storage footprint. These reusable, collapsible containers can help streamline operations for any company that needs to ship and store large quantities of components, produce or inventory. Greenhouse gas emissions, energy consumption and material waste are all greatly decreased with the implementation of reusable, collapsible packaging in the supply chain. Designed to be both tough and user-friendly, these handhelds are suitable for a wide range of applications.

FEATURES

- **VERSATILITY:** Suitable for most material handling applications
- **LOWERED COSTS:** Reduces total packaging costs and disposal costs associated with single-use products
- **USER-FRIENDLY:** Ergonomic handles reduce strain and maximize comfort during handling
- **STACKING STABILITY:** Locking tabs coupled with cross stacking feature provides enhanced stability during transit
- **VENTILATION:** Enhanced airflow improves cooling time for perishable products
- **COLOR OPTIONS:** Available in standard black or other FDA approved non-heavy metal (NHM) colors; metal detectable colors also available
- **ID & BRANDING OPTIONS:** Hot stamp locations on the short wall and base, molded in logos and RFID can be added on short wall
