RTP

RACKABLE PLASTIC PALLET

USAGE

Rackable plastic pallets deliver superior performance in warehouse racking systems, as well as stack loading, closed loop transport, floor storage, and automated material handling applications. Manufactured from co-polymer polypropylene material, these open deck rackable pallets feature a picture frame bottom with runners on all four sides for added stability. Rackable plastic pallets allow for products to be stored above, ultimately saving valuable floor space in warehouses and distribution centers. Perfect for mass transport and storage needs, where vertical racking, warehousing, and optimal space efficiency are a must.

SPECS

- **STRONG & DURABLE:** Geometric shapes and varying wall thicknesses at critical load-bearing and wear points delivers a longer lifespan and a superior strength-to-weight ratio
- **TIGHT TOLERANCES:** High pressure injection molding process produces precise, consistent dimensions on every pallet
- **INCREASED LONGEVEITY:** Proprietary Snap-Lock™ design feature reduces damage from pallet jacks and other material handling equipment
- **EDGE RACKABLE:** Full picture frame and cruciform bottom supports full edge racking and ensures compatibility with conveying and automated pallet handling equipment
- **ANTI-SLIP DECK:** Top deck reduces case slippage and enhances load stability
