COLLAPSIBLE BULK CONTAINER

REUSABLE
TRANSPORT PACKAGING

RTP

USAGE

These bulk containers are designed for the ultimate durability with high-pressure injection molded plastic and an I-beam welded base. This makes them ideal for storing and transporting heavy materials throughout the supply chain. Collapses to 12.5 inches for easy transportation. Plastic gaylords (a common term for bulk containers) are widely used across the automotive industry and its components suppliers, as they often meet the specifications of the Automotive Industry Action Group (AIAG). Collapsible bulk containers are available in various footprints and heights to fit any specialized applications.

FEATURES & SPECS

- **VERSATILITY:** Ideal for automotive, heavy manufacturing, storage, and bulk shipping applications
- **LONG SERVICE LIFE:** Made from HDPE plastics that are structurally rigid and resilient
- **SPACE SAVING DESIGN:** Fit 252 collapsed containers in a 53' trailer, or 80 when fully loaded
- **DAMAGE PREVENTION:** Sidewalls completely collapse, reducing potential damage to walls and hinges
- **SAFE HANDLING:** 4-way forklift entry and two access doors (optional)
- **100% RECYCLABLE:** Manufactured with HDPE polymers that can be fully recycled
