

STACK & NEST BULK CONTAINER

REUSABLE
TRANSPORT PACKAGING

USAGE

Strong, nestable and stackable, this 180° stack and nest bulk container is the largest stackable and nestable container on the market. Thanks to its monobloc design and food-safe HDPE material, this container is easily sanitized, and performs well in chilled conditions. This container also has smooth walls and drainage holes that allow for the easy removal of liquids and contaminants. Impact bumpers on the long sides enable this container to be tipped/dumped without damage. All six label zones have a special non-stick surface that ensures clean, easy removal without leaving any adhesive residue behind. These stack and nest bulk containers are trackable and traceable thanks to an RFID option, and they are also SmartLink® ready.

FEATURES & SPECS

- **APPLICATIONS:** Bulk capacity is suitable for automotive manufacturing, agriculture, harvesting, and bulk distribution
- **INCREASED EFFICIENCY:** Maximize shipping returns, and optimize warehouse storage capacity
- **180° STACKABLE:** Containers securely stack on top of one another
- **NESTABLE:** Containers stack inside one another when empty to maximize return quantities and optimize storage space
- **ERGONOMIC DESIGN:** Integrated carry handles on all sides, and a 2 runner, 2 feet base design for use with material handling equipment
- **HEAVY-DUTY CONSTRUCTION:** Built to withstand heavy loads up to 1,322 lbs.
- **FOOD SAFE:** Made from food-grade HPDE, designed to perform well in chilled environments
- **100% RECYCLABLE:** Eco-conscious polymers can be fully recycled at end of service life
