

RACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

These GMA standard sized rackable plastic pallets can be used with open span storage systems, edge racking, and beam racking. High pressure injection molded rackable pallets are manufactured specifically for superior impact resistance. These 48 x 40" rackable plastic pallets eliminate damage from loose nails, splintering, and structural warping that are common issues with wooden alternatives. Rackable pallets are ideal for all industries that require handling heavy duty cargo in racking systems or automated conveyors. These rackable pallets are also made from FDA approved material, which makes them ideal for food, beverage and pharma applications that require high racking capabilities.

SPECS

- **MINIMAL MAINTENANCE:** Resistant to mold, mildew and rib design is easy to clean
- **ERGONOMIC HANDLING:** 4-way forklift and pallet jack access with tapered openings
- **LOAD CAPACITY:** Up to 2,200 lbs in an edge-supported rack
- **FOOD GRADE:** Made from FDA and USDA approved materials
- **100% RECYCLABLE:** All plastic, eco-friendly design can be fully recycled
- **ISPM-15 EXEMPT:** Cuts in-house sanitation costs, and simplifies export procedures
- **OPTIONS:** Choice of HDPE or PP resins, color options, labeling/identification, and RFID
