RACKABLE AND STACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

These rackable and stackable plastic pallets are made from high quality polymers, and are molded as one continuous piece. This unibody construction delivers consistent dimensional tolerances, easy cleaning, and optimal strength to weight ratios. They are designed to be used in racking systems that are found in many industries and applications. The open deck makes them ideal for mitigating leaks and spills, and the flow-through design makes them easy to clean and sanitize. This open deck rackable and stackable plastic pallet is built tough, and highly resistant to damage from impacts throughout the supply chain.

SPECS

- **HEAVY CAPACITY:** Up to 8,800 lbs. for static loads and 4,400 lbs for dynamic loads
- **ERGONOMIC HANDLING:** Easily transportable, comfortable gripping and maneuvering
- **4-WAY ENTRY:** for forklift compatibility and expedited item transfer
- **PROTECTS CARGO:** 0.2 inch safety rim prevents products from shifting during transport
- **MULTI-USE DESIGN:** Stackable and rackable, built for efficient item storage
- **CONVEYABLE:** Use with conveying systems and high rack storage
