RACKABLE PLASTIC PALLET

USAGE

Rackable plastic pallets are specifically designed for use in racking systems that are found in many industries and applications. Plastic pallets are safer, cleaner alternatives to traditional wooden or metal pallets. Manufactured from high-quality plastics, rackable pallets effectively prevent any mildew/mold, bacteria, and insects from harboring within the pallet. In addition, each pallet features a uniform structural integrity, meaning no weak links, no splintering, and no rusty nails.

SPECS

- **RUGGED DESIGN:** Three runner base delivers excellent strength and support in racking systems
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts
- **RACKABLE:** Vertical racking compatibility enables massive storage and warehousing options
- **STACKABLE:** Allows for efficient, safe stacking that reduces transport costs
- **AUTOMATION READY:** Compatible with various types of conveyor and ASRS systems
- **OPEN DECK:** Allows flow-through for leaks and spills, and facilitates easy cleaning
- **SUSTAINABILITY:** Reusable and 100% recyclable at the end of its service life
- **ISPM-15 EXEMPT:** No need for costly sanitation and fumigation, cuts costs and labor.
