

RACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

Rackable plastic pallets are durable for superior performance in warehouse racking systems, as well as stack loading, closed loop transport, floor storage, and automated material handling applications. Manufactured from HDPE plastics, these rackable pallets feature a picture frame bottom with runners on all four sides for added stability. Rackable plastic pallets allow for products to be stored above, ultimately saving valuable floor space in warehouses and distribution centers. Perfect for mass transport and storage needs, where vertical racking, warehousing, and optimal space efficiency are a must.

SPECS

- **SUPERIOR RACKING:** Reinforcements I boost rack capacity to 2,854 lbs. with evenly distributed loads
- **PROTECTS CARGO:** Resistant to chemical spills, infestations, mold, and moisture
- **ERGONOMIC HANDLING:** 4-way fork entry for streamlined bulk transfer
- **DURABLE CONSTRUCTION:** Picture-frame base with runners handle heavy loads with ease
- **100% RECYCABLE:** Eco-conscious polymers can be recycled and returned to service
- **OPTIMIZED TRANSPORT & STORAGE:** Perfect for mass transport needs, and rack compatible for increased storage potential
- **OPTIONS:** Reinforcement rods, rubber grommets, and perimeter lip available
