

STACKABLE PLASTIC PALLET

REUSABLE TRANSPORT PACKAGING

USAGE

Ideal for use in transport applications with high circulation rates, these stackable 45 x 45" plastic pallets have robust carrying capacities, long lifespans, and are impact resistant to withstand the rigors of daily use. Structurally rigid, durable and fully recyclable, gas-injection polymers are also highly resilient, resistant to bending, and are perfect for high-bay racking. Used in either open or closed-loop operations, plastic pallets are far more efficient and eco-friendly option than disposable wood or metal alternatives.

SPECS

- **DURABILITY:** Manufactured from HDPE using a high-pressure injection molding process, with a welded construction for additional strength
- **TIGHT TOLERANCES:** Precise dimensional tolerances on every pallet, assuring quality and consistency
- **STACKABLE:** Vertical stacking is efficient, safe, and reduces transport costs
- **AUTOMATION READY:** Full picture frame base ensures compatibility with conveying and automated pallet handling equipment
- **SAFE HANDLING:** 4-way entry design allows easy transport and handling
- **SUSTAINABILITY:** Available in PCR plastic, and each pallet is 100% recyclable
- **OPTIONS:** Perimeter lip, barcoding, labeling, and RFID available
