

RACKABLE PLASTIC PALLET

REUSABLE TRANSPORT PACKAGING

USAGE

Rackable plastic pallets are specifically designed for use in racking systems that are found in many industries and applications. Plastic pallets are safer, more clean alternatives to traditional wooden or metal pallets. Manufactured from high quality plastics, heavy-duty rackable pallets effectively prevent any mildew/mold, bacteria, and insects from harboring within the pallet. In addition, each pallet features a uniform structural integrity, meaning no weak links, no splintering, and no rusty nails.

SPECS

- **MATERIAL HANDLING:** Perfect for bulk item storage, transport, distribution, and display.
- **RUGGED DESIGN:** Full picture frame bottom delivers maximum strength and rigidity.
- **ERGONOMIC HANDLING:** 4-way entry slots compatible with forklifts and pallet jacks.
- **RACKABLE:** Vertical racking enables massive storage and warehousing options.
- **STACKABLE:** Secure, and reliable stacking options increases storage capabilities.
- **100% RECYCLABLE:** Reusable plastic polymers can be fully recycled.
- **ISPM-15 EXEMPT:** No need for costly sanitation and fumigation, cuts costs and labor.
- **OPTIONS:** HDPE or PP material, and custom name, logos, and RFID options available.
