USAGE

An ideal storage solution for food service establishments, this tote box is both sleek and practical. This box optimizes storage efficiency with its stackable, streamlined build. With a rigid polypropylene construction and an attached lockable, metal hinged top lid, it will keep your stored items safe from damage, free from contaminants, and prevent costly loss of product. The label area on the attached hinged cover allows for easy reading and quick label exchange. When the lid is closed, it can be stacked to save space, but the bin nests inside when the lid is open. The ribbed walls provide extra strength and prevent the box from bowing or flexing when filled to maximum weight capacity. The contoured handles are seamless so they save space without sticking out from the box, and they also provide comfort when moving the box.

FEATURES

- **APPLICATIONS:** Automotive products, refrigeration, retail, distribution, and agriculture
- **NESTABLE:** Efficiently nest inside themselves when empty for maximized storage
- **AUTOMATION COMPATIBLE:** Works seamlessly with automated systems
- **DURABLE:** Injection molded polypropylene has a long lifespan and resists damage
- **RECYCLABLE POLYMERS:** Plastic components can be fully recycled when necessary
- **DURABILITY:** Injection molded HDPE delivers a long lifespan and resists damage
- **EFFICIENT PICKING:** Perfect for split-case picking, shipping, and distribution
