

RACKABLE PLASTIC PALLET

REUSABLE TRANSPORT PACKAGING

USAGE

These lightweight and versatile rackable plastic pallets have been optimized for impact resistance, racking, and long- service life when used in closed loop environments. Designed with reinforced double-wall blocks, these rackable plastic pallets are resilient against impacts from pallet jacks, forklift tines, and drops. This rackable plastic pallet features a textured top deck to increase friction between product and the pallet itself, improving safety and minimizing potential for damage and loss. This pallet is available in non-reinforced, 3 rod and 5 rod reinforced models, with optional rubber grommets and an option for a discontinuous perimeter lip on the top deck.

SPECS

- **RACKABLE:** Reinforcements enable vertical stacking options which increase storage capability and efficiency
- **METAL REINFORCEMENTS:** Available with 3 steel rods, 5 steel rods, on non-reinforced
- **HEAVY-DUTY:** Racking capacity up to 3,306 lbs. for steel reinforced models
- **ISO COMPLIANT:** Certified ISO 9001:2015
- **ERGONOMIC HANDLING:** 4-way entry compatible with forklifts for expedited item transfer
- **EASY TO CLEAN:** Resists chemical spills, moisture, mildew and is easy to sanitize
- **100% RECYCLABLE:** Eco-friendly polymers can be recycled when not in service
- **OPTIONS:** Choice of metal reinforcements (0, 3 or 5 rods), and optional perimeter lip available
