RACKABLE PLASTIC PALLET

REUSABLE
TRANSPORT PACKAGING

USAGE

These 37 x 37" rackable plastic pallets are durable for superior performance in warehouse racking systems, as well as stack loading, closed loop transport, floor storage, and automated material handling applications. Manufactured from HDPE plastics, these open deck rackable pallets feature a full cruciform bottom with runners on all four sides for added stability. Plastic pallets allow for products to be stored above, ultimately saving valuable floor space in warehouses and distribution centers. Perfect for mass transport and storage needs, where vertical racking, warehousing, and optimal space efficiency are a must. This pallet is available in your choice of non-reinforced or reinforced 4-rod models.

SPECS

- **RACKABLE DESIGN:** Delivers an edge racking capacity of up to 2,100 lbs. (reinforced) or 1,200 lbs. (non-reinforced)
- **ANTI-SLIP DECK:** Open deck and grommets prevents cargo from slipping, shifting and toppling
- **STACKABLE:** Can be safely stacked either loaded or unloaded to optimize storage and transport space
- **CONVEYABLE:** 6-runner base allows for smooth travel and transfers on conveyors and other automated equipment
- **EASY ACCESS:** 4-way entry compatible with forklifts and pallet jacks
- **SIMPLE SANITATION:** HDPE pallets are resistant to most chemicals and are easy to clean
- **OPTIONAL REINFORCEMENTS:** Available with or without rods for added racking capacity
